

Complete Workplace Solutions from AgilQuest

Businesses and government agencies must both “do more with less” these days and still be successful. Technology makes it possible for workers to be productive without being in the office every day, but it takes more than the latest mobile devices and apps to add up to success. Guaranteeing workers a place to be productive when they need it and making sure the organization has the right amount of space takes expertise, technology, support and training. That winning combination is exactly what we deliver everyday.

“Do More with Less” and still support mobile workers and real estate reduction

There is no single answer or magic bullet that meets your organization’s requirement to reduce office space costs and yet still support the ever-growing needs of your mobile workers. Many companies jump right in and purchase software and technology, only to discover user adoption issues or executive buy-in obstacles or misalignment with IT goals. The needs to right-size real estate and yet maintain a supportive work environment remain, but it takes a comprehensive, holistic approach to do it right.

We start with best technology for global enterprises and federal agencies and wrap our delivery in expert planning and analysis, training and onboarding for every level, and the right methodology to match existing processes and policies with support and management.

Expertise

Learn how modern workplace change will fit into your culture, build the business case, develop plans for getting buy-in, and establish the baselines and goals with help from the experts in traditional and alternative workplace strategies.

AgilQuest’s team combines workplace expertise with leading edge technology expertise to leverage the best tools within real world environments to achieve goals and long term success.

Support

Every workplace culture is unique and needs different support, so we deliver the hand holding, customization and level of support best for your environment and goals.

Technology

Reserving desks and meeting rooms is critical to a productive, mobile-friendly workplace, but users demand multiple interfaces, personalization features and localization to adopt and fully utilize any new system.

OnBoard provides interfaces users want and an API for IT to build their own. Commander BI makes presence detection robust, supporting real estate decision-making and space planning with accurate, portfolio-wide data and actual utilization reporting.

Training

Managers and workers need training on how to work and collaborate in the new workplace, so AgilWork e-Learning teaches as needed, wherever needed via the web.

Talk with our Workplace Services team today to develop the complete plan for your workplace program, implement the best technology, and get your entire organization onboard! Call AgilQuest at **877-740-3981** or visit **agilquest.com/contact-us**
